with over Thousands of Spray Nozzle Types SPADFLOW has become Iran's leading producer.

### From Design to Installation

with Skilled engineers and project managers, SPADFLOW is providing consultancy and support services.

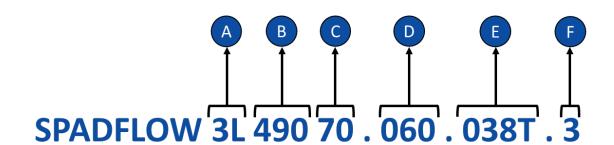

# Knowledge and Experience

as an Expert on spray technology, SPADFLOW is at the forefront of production and innovation.

# **PRODUCT NUMBERS**Everything You Need to Know

# **Nozzle Series**

# **Flow Rate Rank**

The flow rate rank is relative and depends on the respective nozzle type. The exact value is mentioned in tables on the product pages.

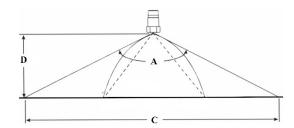

# **Spray Angle**

Theoretical spray angle is mentioned in tables on the product pages. Actual spray angle depends on installation and alignment.

A = Theoretical Spray Angle

D = Spray Distance

C = theoretical Spray Coverage

### Ø B (Equivalent Bore Diameter)

Applies to elliptical discharge holes of flat fan nozzles. A cylindrical hole with a diameter A has the same surface area as the ellipse.

### Ø E (Narrowest Free Cross Section)

Important Characteristics for determining the pre-filtration of a nozzle. Can be less than a due to several swirl ducts.

Conversion Formula: K factor  $\times \sqrt{P(bar)} = Q(I/min)$
